

Nawazish Hussain

Novosibirsk, Russia | nawazishpatana@gmail.com

RESEARCH INTERESTS

Machine Learning, Computer Vision, Natural Language Processing, Multimodal Learning, Biomedical AI, Information Extraction, Knowledge Graphs, and Trustworthy AI.

EDUCATION

M.S. in Artificial Intelligence and Big Data Analytics

Sep 2024 – July 2026

Novosibirsk State University, Novosibirsk, Russia

CGPA: 4.5/5.0

B.S. in Computer Science

Oct 2018 – Aug 2022

PMAS Arid Agriculture University, Rawalpindi, Pakistan

CGPA: 3.12/4.0

PUBLICATIONS AND RESEARCH OUTPUTS

Accepted / Presented

- **Hussain, N.** *Automatic Identification of Main Scientific Claims in Brain Tumor Research*. MNSK Conference, accepted and presented, Apr. 21, 2026.

Submitted Manuscripts

- **Hussain, N.** *ClaimGraph-BT: Automated Claim Extraction and Cross-Paper Comparison for Brain Tumor AI Literature*. AIST Conference 2026, Submission No. 32, submitted via OpenReview, July 1, 2026.
- **Hussain, N.** *AI-Assisted Scientific Claim Extraction and Evidence Comparison in Brain Tumor Research*. International Conference on Higher Education and Sustainable Development (ICHESD 2026), abstract accepted for presentation, Sept. 24, 2026.
- **Hussain, N., et al.** *MedSETNER: A Benchmark Corpus for Extracting Dataset Names from Medical Scientific Literature*. AIST Conference 2026, Submission No. 30, submitted via OpenReview, July 1, 2026.

Research Dataset

- **Hussain, N.** Research dataset published on Zenodo. DOI: 10.5281/zenodo.20364566.

ACADEMIC PROJECTS

1. **Bachelor's Final Year Project: 🛒 Gems Bazar** – Developed an e-commerce website for dry fruits and gemstones featuring retail and wholesale purchasing, custom orders, and multiple payment methods using HTML, CSS, JavaScript, PHP, and MySQL.
2. **Identification and Prediction of Chronic Diseases Using Machine Learning** – Developed predictive machine learning models for healthcare data analysis.
3. **MLOps Project using Docker and DagsHub** – Built a reproducible machine learning workflow for experiment tracking, version control, and model management.
4. **Age and Gender Prediction using DeepFace** – Developed a Python application for facial age and gender prediction using the DeepFace framework.
5. **Project Management at Stream Data Analytics and Machine Learning Lab** – Contributed to project coordination and technical activities in machine learning and data analytics projects.

Other Projects

Smart Agriculture Chatbot 🐙 GitHub

- Developed an AI-powered Flutter application providing agricultural assistance through an intelligent chatbot.
- Integrated Firebase Authentication, Cloud Firestore, REST APIs, and real-time weather forecasting.
- Implemented SoilPedia, farming tips, and location-based services to support smart agriculture.
- Technologies: Flutter, Dart, Firebase, REST APIs, Geolocation.

Quran Application GitHub

- Developed a cross-platform Islamic mobile application using Flutter and Dart.
- Implemented Holy Quran reading, prayer times, Qibla direction, Azkar, and daily Duas.
- Integrated GPS-based location services and SQLite for location-aware features and local data storage.
- Technologies: Flutter, Dart, SQLite, Provider, Geolocator, Material Design.

Hajj & Umrah Guide App GitHub

- Developed a Flutter-based mobile application providing comprehensive Hajj and Umrah guidance.
- Integrated Firebase Authentication, GPS-based prayer times, Qibla direction, weather updates, and local data storage.
- Implemented modules for pilgrimage guidance, Duas, hotels, transportation, visa information, and emergency contacts.
- Technologies: Flutter, Dart, Firebase, SQLite, REST APIs, Google Maps, Geolocation.

PROFESSIONAL EXPERIENCE

Researcher, Stream Data Analytics and Machine Learning Lab Nov 2025 – Current

- Conduct independent research in Machine Learning, NLP, and Computer Vision.
- Develop and evaluate AI models and prepare research for publication.

IT Trainer, Government of Gilgit Baltistan Apr 2024 – Sep 2024

- Delivered Python training through practical programming exercises and project-based learning.
- Mentored learners in problem solving, algorithmic thinking, and software development fundamentals.

Software Developer, Softify Technologies Jun 2022 – May 2024

- Developed Android applications across multiple sectors with API integration and AI-enabled features.
- Contributed to application design, implementation, testing, and deployment workflows.

Internee, Sina Institute of Networks and Aesthetics Mar 2019 – Sep 2019

- Provided technical support, system setup, maintenance, troubleshooting, and user training.

TECHNICAL SKILLS

Programming: Python, C++, PHP, JavaScript

Machine Learning: Supervised Learning, Deep Learning, Model Evaluation, Feature Engineering

NLP: Transformers, BiomedBERT, Flan-T5, Information Extraction, Text Classification

MLOps / Experiment Tracking: Docker, DagsHub, MLflow, Git, GitHub

Web / Mobile Development: HTML, CSS, XML, Flutter, Android, iOS, React Native

Development Tools: Visual Studio Code, Android Studio, XAMPP

Operating Systems: Unix/Linux, Windows
